Meteorological Headquarters

Sector H-8/2

Islamabad, Pakistan

Islamabad, 22nd October 2024

Dengue Alert II:

Dengue may likely to subside in November; Next two weeks are still critical.

Based on the current meteorological conditions and anticipated future seasonal outlook and trends of atmospheric variables, it is expected that dengue cases may likely decline in November. However, the next two weeks are still crucial, as the prevailing atmospheric factors are favoring the conducive environment for dengue.

All stakeholders are urged to take pre-emptive measures to address the prevailing dengue situation in Pakistan. National health agencies and dengue control centers are advised to stay updated on the latest information from the Pakistan Meteorological Department (PMD) website: <http://www.pmd.gov.pk>
